American jobs

Brenda is an operating engineer, and she knows the promise of Canadian oil sands. Today, Canada is America's number-one supplier of imported oil *by far*, and tomorrow our neighbor could supply even more. Canadian oil sands are the second-largest proven oil reserves on Earth, and developing this resource and the infrastructure to bring this energy to U.S. consumers could support 600,000 American jobs by 2035. Thousands of skilled workers are ready to start work provided that the government issues a permit for the Keystone XL Pipeline. Energy from Canada can keep driving America's economic recovery – and provide a stable, secure energy resource for generations to come.
